Subject: Re: More data from Tate Kunkle

FYI. I have decided to look closer at 2-3 wells, in order: Carter, then Johnson, and probably Scott Ely. Any suggestion for prioritizing is welcome! Preliminarily, these 3 had the most hits above somewhat questionable background values (these studies are lacking!) along with health-based comparison value exceedances (which are not effect but just screening levels). Carter's flags the most.

Subject: More data from Tate Kunkle

Kunkle (Dimock residents' lawyer) sent three emails with more data from August/September timeframe. It was sent to Dave Polish and me so I loaded it onto the Dimock folder which we all have access to:

L:\Share\Water Protection Division\dimock

It is interesting data with many more hits (including organics), but I have yet to put the lab sample IDs with a resident's well IDs. Working on it.
